Our pedigree for high quality composite doors is unparalleled and we've now raised the bar even further - welcome to Safeguard nxt-gen, the latest in composite door technology.

It's called Safeguard nxt-gen for good reason, as it combines

symmetry and balance with enhanced security and weather proofing features to give you and your home a beautifully sleek and exceptionally secure entrance door. It's our next generation of composite doors...welcome to the future.

Introducing Safeguard next-gen

WHY CHOOSE A SAFEGUARD NXT-GEN DOOR?

Unparalleled Security

Thanks to its rigid polymer subframe, high density CFC-free polyurethane foam core, high impact resistant GRP skin and high quality multi-point locks.

Exceptional Durability

High impact resistant glass reinforced polyester (GRP) skin will maintain its pristine appearance in the face of everyday knocks and scratches and beyond.

Low Maintenance

Everything about our GRP composite doors are designed to be easy to maintain, including the triple glazed options insulated glass unit which encapsulates the delicate decorative glazing between two panes of clear glass, protecting it and making it easy to keep clean.

Stunning Aesthetics

Symmetry and balance are very much key elements as we want you to look at your door and feel it is perfect in every way. The woodgrain finish was developed from oak tree grain, creating a beautifully authentic appearance.

Flush Fitted Beading

Superb Sound Insulation

Weighted noise reduction of 31 decibels. It means you can be sure your new door will keep outside noise to a minimum, helping to make your home the haven you want it to be.

Excellent Weatherproofing

Water resistant polymer composite rails that protect its core. This means it won't suffer from water absorption which can lead to skin de-lamination and cause functional problems that lesser products have. Your door will keep the weather at bay and stay looking good for longer.

Colour Range

Standard options

- Colours are only as accurate as the printing process allows.
- Due to the painting process, no colour match can be guaranteed between the coloured door leaf and the door frame.
- Pembroke available in white and bespoke colours only.

Hardware

No door is complete without some stunning hardware to finish it off. Our hardware is manufactured to internationally recognised standards, so you can be sure that every product is perfect, from how the hardware feels in your hand through to its functionality and finish.

We don't compromise on quality - each piece of hardware is engineered for enhanced strength and durability, whatever your style preference.

Surface Finishes

- | | | |
|---|---|---|
|  |  |  |
| White | Hardex Gold | Hardex Chrome |
|  |  |  |
| Hardex Graphite | Hardex Black | Antique Black |

Classic

Classic design for the modern home. Not overly fussy or fancy, our classic range offers neat, timeless style to suit any type of home.

Heritage

Complementary styling for any period home. Ideal for heritage buildings and old cottages. Available in Black only.

More than just Matching

At SafeGuard, we give the smallest details our full attention to ensure we deliver a perfect product on every door and window.

- Prohesion Testing - Accelerated real world testing; Salt spray, cooling, heating & respraying
- Hardex Finish - Invisible skin that creates unmatched resilience
- Crafted Furniture - Engineered for enhanced strength and durability

ULTION

STAYS LOCKED

When the Ultion lock detects an attack, it goes into **Double Lockdown Mode™**
A hidden attack lock secures the mechanism.

Double Anti-Snap protection
The intruder needs to snap Ultion twice before he sees the core.

2 Attack locks
Lock still works from inside after an attack.

2 Part Plug design
With molybdenum - stronger for longer.

20 Drill Defences
8 hardened steel rods and 2 plates in both ends.

25% Denser than iron
The molybdenum core that houses the attack pins.

BURGLAR-PROOF YOUR DOORS

75% of intruders go through the door

39% get through the door by forcing the lock

How locks are forced

Lock Drilling

Lock Bumping

Lock Snapping

Lock Picking

9/10 of forced locks are snapped

3 Stars
The highest TS007 test rating.

1 Sold Secure Diamond
The standard most 3 star locks can't achieve.

Protects for longer
The close keyway wipes debris off the key to stop jamming and lockouts.

Thicker key
Increased pick protection

0 Magnets
Magnetised keys carry metal filings from other keys and coins into the lock.

We'll pay you **£2000**

If an intruder burgles your home by snapping Ultion, we'll pay you £1000

ULTION
KEY CONTROL

Every body approves.

Approved by locksmiths

Few locks survive the test designed with the Master Locksmith Association and carried out by locksmiths.

Approved by the Police

The official UK Police flagship initiative combining the principles of 'designing out crime' with physical security.

Approved by British Standards

Kitemark is the standard of excellence recognised around the world. Ultion is accredited with the highest 3 star rating.

Technical Figures

A SafeGuard GRP composite door has a wealth of facts and figures that prove its quality. The door:

- Reduces outdoor noise by an average of 31dB
- Achieves Global Warming Potential (GWP) score of less than 5
- Achieves Ozone Depletion Potential (ODP) score of zero
- The door leaf and glazing system are major components when part of a door set and have a proven ability to achieve PAS24:2016, industry's enhanced security standard, a prerequisite in attaining certification to Secured by Design a police initiative to protect against unlawful intrusion

Everything about a SafeGuard GRP composite door has been designed to enhance your home for years to come.

Care and Maintenance

To keep your door clean, prolong the life of the surface finish and protect your warranty, we recommend you wash it regularly using warm soapy water (washing up liquid is ideal) and a soft, lint-free cloth. If you live in a coastal area, in a heavily industrialised area or near a main road, you may need to clean your door more frequently.

It is important that you DO NOT use any of the following on your door:

- Abrasive cleaners or scouring pads
- Any type of bleach or solvent (e.g. white spirit, methylated spirit, cellulose thinners, acetone or nail varnish remover)
- Any type of adhesives or tack for providing temporary protection or fixing of seasonal or other decorations etc.
- High pressure or steam cleaners

Door Construction

Every SafeGuard GRP composite door is manufactured to the highest of standards to ensure it is strong, durable and secure. We have sold over four million doors to date, evidence of the quality and exacting specification we demand.

The door has a perimeter sub-frame of a solid, water-resistant polymer material, which is reinforced with Laminated Veneered Lumber (LVL). A thermoset GRP skin is bonded to this sub-frame and the core of the door is then filled with high density, 100% CFC-free polyurethane foam. Water resistant polymer composite rails protect the core from damage or water absorption and the high impact resistant thermoset GRP skin keeps your door looking great for longer!

The door's core is what makes it so thermally efficient and so good at reducing sound. In fact, it is the most thermally efficient door on the market, increasing your home's energy efficiency and saving you money on your energy bills.
